

Feb 1989. PB Study Pd A  
Field Notes

\* Trip to B.H. with bad back.

See Coendou

\* Typical day of PBs. locate 3 groups; it rains; no cars where they are supposed to be.

\* Grupo de Calos - dragging up & down hills

\* Processing Pensy non - ♀ aborts Pensy non high on hills but overlooks road - Incongruity - halie chasing Pens.

\* 3½ hr encounter between Tres Machos + Casa Linda

\* Bad back - Trip to + from BH. - overburdened truck

\* FB with Riverbanks up + down hills to find them

- (4) LC

11:06 Contact with Caeador.  
Sunny clear day  
Begin PB with Caeador  
11:30 hrs.  
Group is eating not  
moving much.  
They respond to 1st  
PB of LCC very well.  
They call and approach  
the speaker.

The 2nd voc. The  
bird song, they ignore.  
Although the animals

boos  
in road  
51

separate towards the end of the scans & there's a lot of LCs within the group, during 2nd 10 minutes.

They respond a bit with SC after SC. With LC they don't vocalize but approach the speaker immediately.

LC was slightly softer than the others. We do a 2nd playback of LC after the ext is finished with same

result. Animals approach.  
the speaker.

16 Feb

Awoke 0530

Not into mata until

0830

Needed to try out  
copy of tape. <sup>Sunny</sup> <sub>clear day</sub>

Put alcohol in car

Took @ 30' to find

2° aqua.

♀ w/ infants @  
1 week. Moving more  
slowly.  $T_{1,4}$  is  
other adult ♀ in  
group (reproductive).

Apparently she is often  
on periphery.

There are 5 juvs +  
a subadult ♂ as well.

We start experimental  
playbacks @ 0930. The  
first Pb is too weak,  
so we repeat it at  
a shorter distance. Decide  
to finish exp with  
Zik's tape (a copy).

Finish group @  
1400 hrs. Eventually  
decide it will take too  
long to ~~complete~~ get to  
2nd group.

Return to house @ 1500  
hrs

2 ♂ that disappeared  
mid Jan from Poco  
Peyneca appeared at  
house & fought with  
♂ Niko (who suffered some  
cuts - leg & hand).

Later we decide to  
release the ♂ tomorrow  
& move Niko's group (a  
reintro'd'gry) to Boi Branco.  
I hold the equis.

Town mtg.

Process 2 animals

Eat, continue to discuss &  
decide to move  
the animals

17 Feb 89

0745 Make contact with P.P.

~~Day~~. Sunny Clear

day. PB Experiment  
with Pogo Pegueros.

Finish @ 1140

Reach Rd @ 1200

1234 no car~~k~~  
We eat + head  
down road to  
GC. Grupo de Caña

Zona tres @ 3-5 x  
40 get group's signal  
w/o success.

Also Fernando was

supposed to leave the car at one trail.

The Zema finally gets a signal. Is sure that the animals are in deep sleep. But it takes very little time to find them & the area isn't bad.

We manage one PB & it starts to pour in the middle of the 2nd set of intervals. We finish the one series & move to the road. No cars.

We walk to the gate Nocari; we wait a bit. 15.30 hrs.

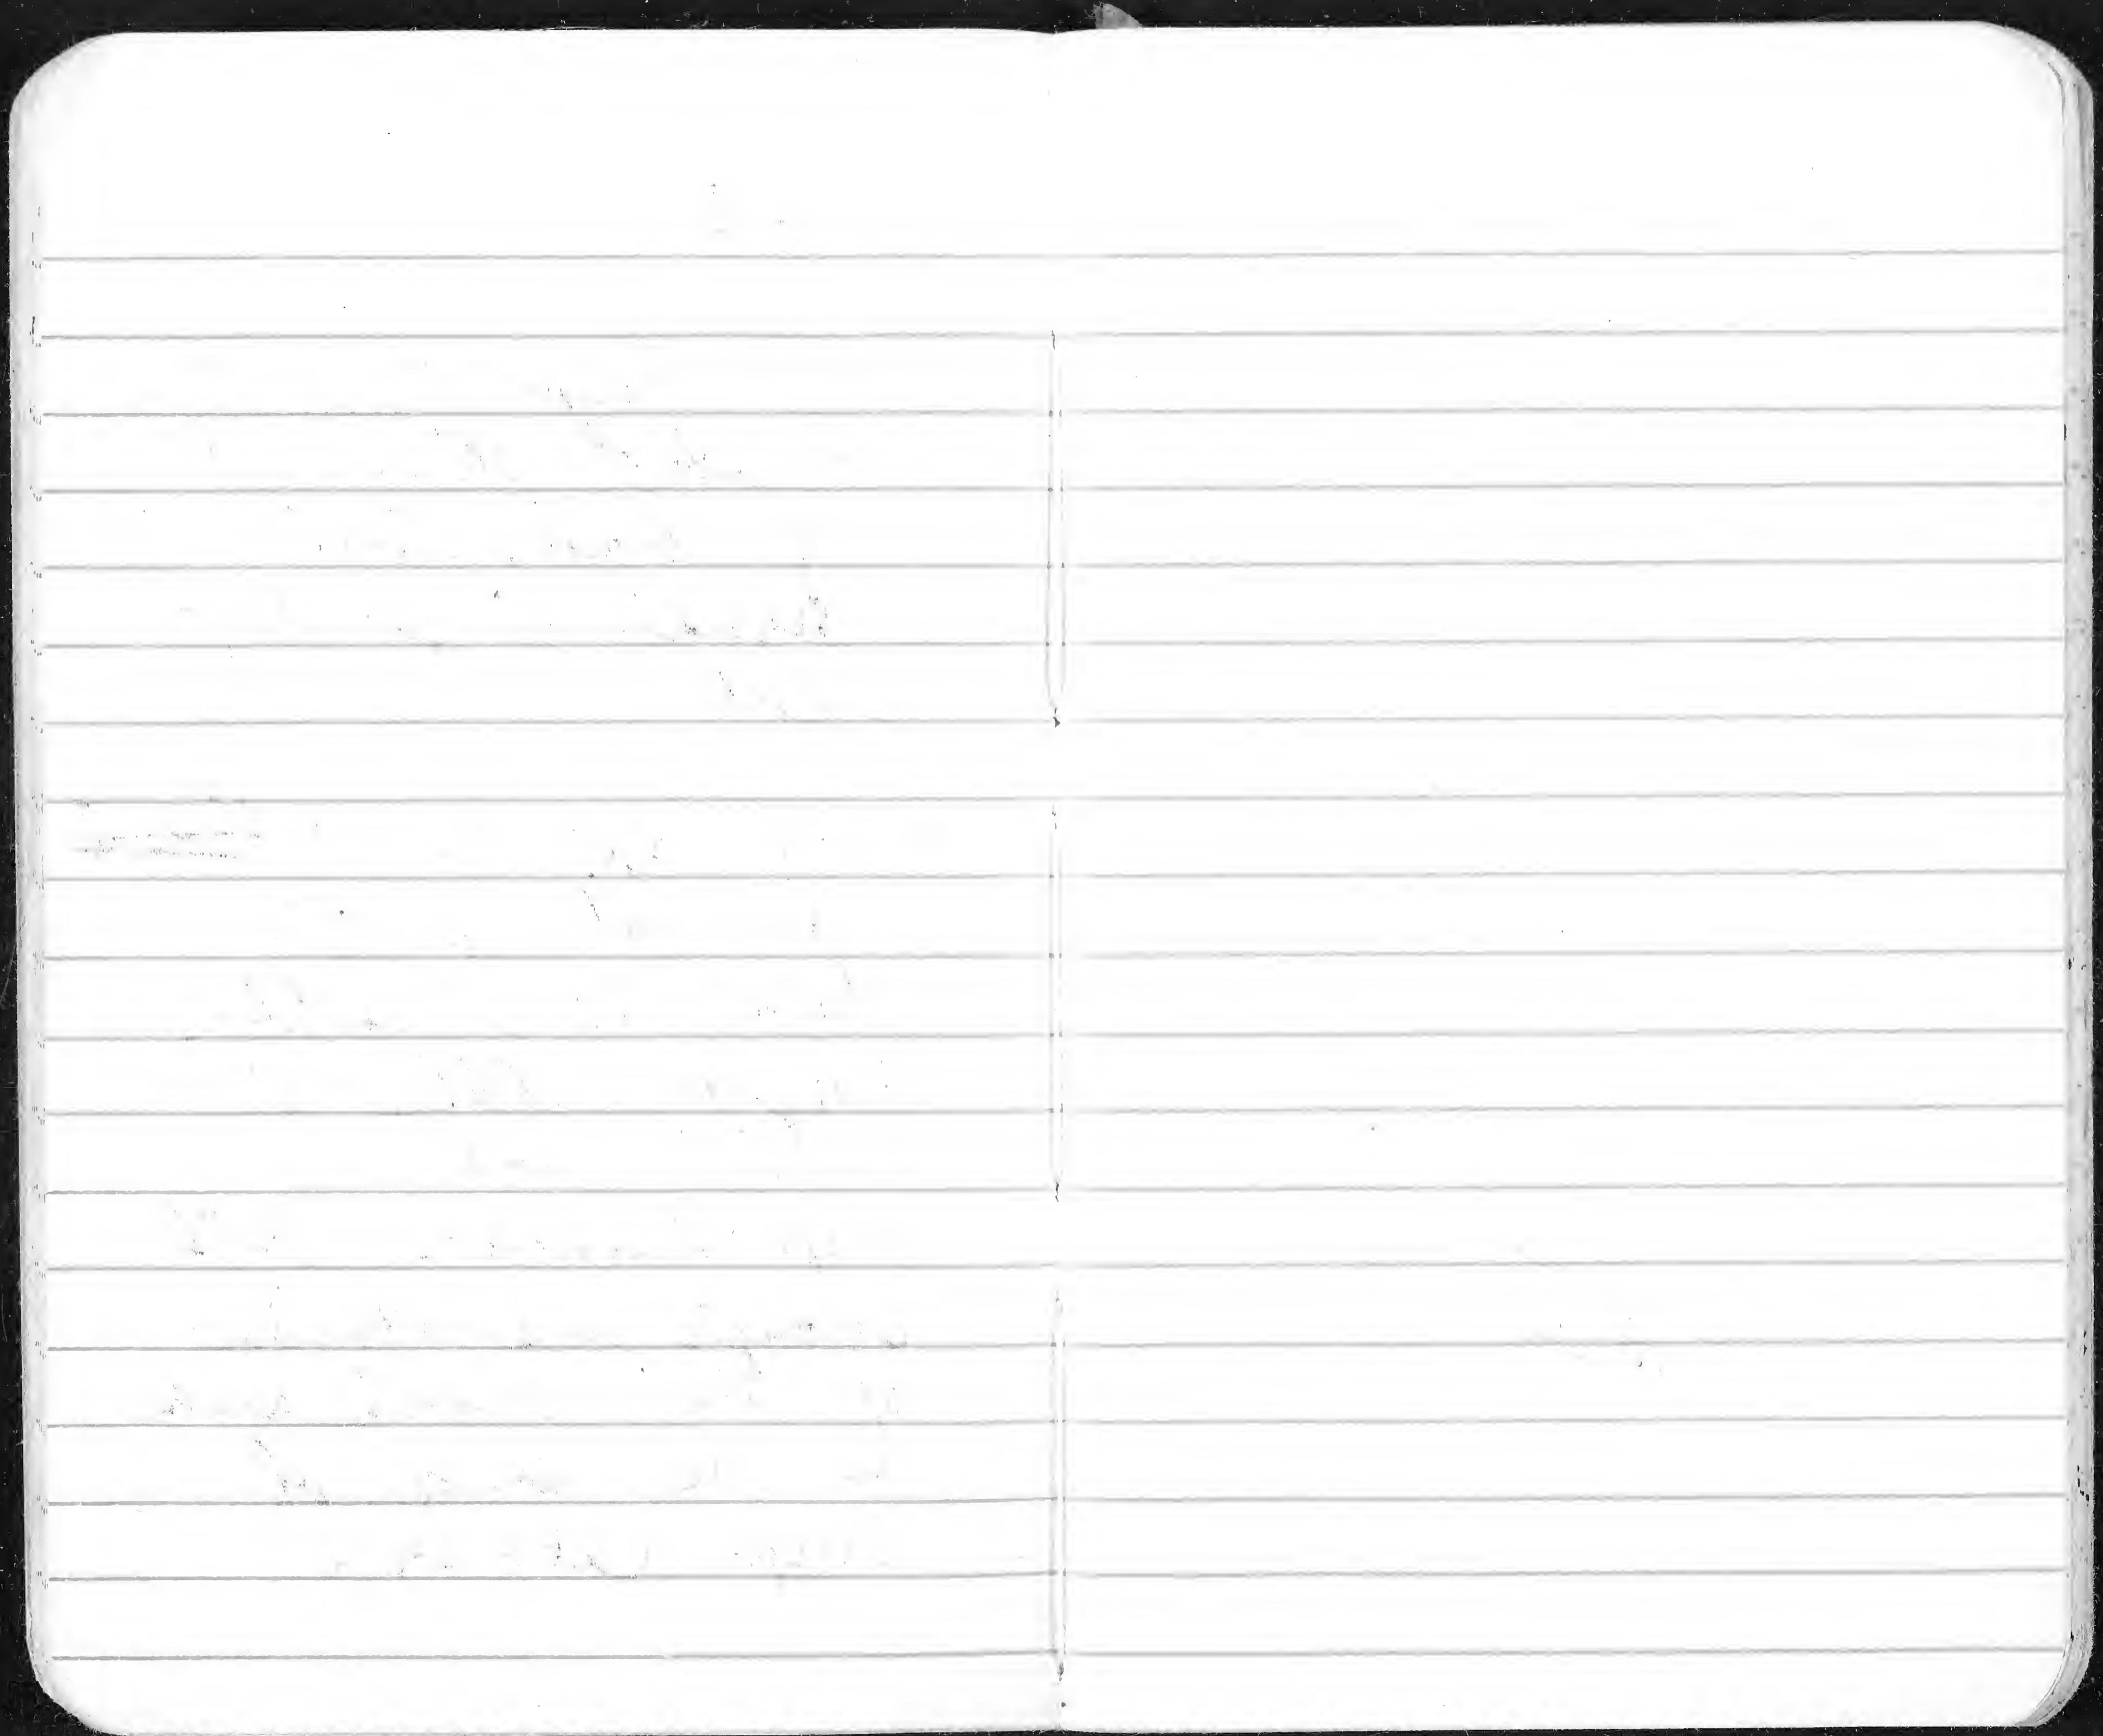

1527 - We sit by  
case. Rain has stopped.  
It's cooler.

We start walking &  
Jenulson picks <sup>us</sup> up in  
about 15 minutes.

18 Feb

0740 Grupo do Carlos located other side of road. Their signal is pretty weak.

0744 SKill haven't ~~seen~~ <sup>seen</sup> animals but hear LCC calls. Group in middle of encounter with Grupo Reuniao. Both groups are outside of their normal areas in the range of Grupo Calceus.

Encounters seems to  
end @ 0835 hrs.  
& we lose the group.

0852 We've been  
climbing hill & have  
located sound of  
animals They give  
LC as tho isolated.

They remain on top of  
hill for a bit & begin  
moving down.

We begin scans for  
playback @ 0930.  
Finish with group  
@ 12<sup>20</sup>. They

Gry<sup>o</sup> de  
Cerro

*She has  
made  
a wrong*

have dragged us up +  
down hills. I fell  
upside once +  
sink into the brijo to  
my knees.

The ♀ of the group is  
very nervous + overreacts  
to the SC while the  
group really ignores  
the LC (the last  
♂ call).

We get car + meet Jadir  
near the Rudolfo Sal  
trail. Tres Machos  
our next group was in  
the middle of ~~the~~ the  
area where we had  
been — on the other

hillside. Jader has just been with them + suggests that they could end up in an encounter.

We eat lunch.

13° Start looking for 3 Machos.

Finally find them at 1400 hrs after 1 hr of tiring but flat walking.

Walk thru really bad swamp area

before finishing 2 P.B.

Very closed miserable habitat. A 40' walkback

In the evening there  
are 4 animals to  
process from  
Renscyhor. Radio  
needs charging on adult  
♂. All animals have  
ticks from running on  
ground. Are thin &  
dehydrated. Adult  
female aborts one  
 $1\frac{1}{2}$  - 2 mo fetus.

All animals are  
weighed. Only 2 immobile.  
Andrea used the  
Walkman + a speaker  
to bring the animals  
closer.

2/19/89

Contact with Tres  
Machos  
group @ 0749.  
Mr. Machos is LC; LCC  
a bit; responding  
to us. Were in an  
area of encounters  
(same thought)  
perhaps encounter between  
Casa Caida + 3° Macho.  
Thinks ~~not~~ not - but Mr.  
yes

0753 Several animals LC  
Casa Caida group is  
closer.

0926 The animals  
have been LCC  
periodically +  
continue to do so.

There has been little physical contact between the 2 groups & the animals periodically look at one another as they are quieting down & moving away. But they've continued LC.

The juvs & infants are incredibly noisy with their rasping sounds as loud as the LC. As the animals forage in palms etc. The juvs. rasp & beg for food.

Zeng said that he not  
only had the signals of  
Casa Cauda but of  
1-2 males who had  
left Casa Cauda.

10<sup>07</sup>: The encounter  
continues Periodic  
noise of juv +  
inf rasping and LC.

T<sub>34</sub> of Casa Cauda  
approached T.M. gr<sup>g</sup>,  
chased T<sub>6</sub> +  
was within 3 m. of  
reprod. pair + new  
infants.

Then 2 SA  
0907 T<sub>34</sub>/T<sub>34</sub> play

10<sup>10</sup>,

within 2 m of parents +  
infants

Lateral adult ♂ with  
radiis from CC group  
approaches and is  
within @ 10 m of  
parents. Tax of  
T.R. group + adult  
♂ of CC group are  
with arms reach of  
each other.

We do about 3 scans  
between 09<sup>10</sup> - 09<sup>25</sup>  
but quit because of  
The numbers of LCC.

I record voos between  
about 0830 - 1115 during  
the encounter. Enc.  
was at least  $3\frac{1}{2}$  hrs  
long based on arrival/dept.  
leave area @ 11<sup>15</sup> hrs.

Return to house -

3

Andreia shows up w/ 2  
monkeys. 1 female from  
Penuguior + a 2nd ♀ w/  
tattoo whose ID is v.  
unclear. Can't figure out  
if she's wild or reintrod.  
Either way she's moved a  
long distance. Either from  
PdA. or a Riverbanks  
animal come to life.

Work on org. data in the  
PM + read some Tom  
Wolfe. 1st time ever  
that I'm alone at  
house.

Perscynor ♂ with  
broken leg & processed  
at night.

They had been sleeping in  
P. box when Andreia  
arrived to release P.  
group.

2/20/89

0830 Contact 3M  
after @ 40 min  
walk.

Near area of  
~~yesterday's~~ line.  
@ 150 m.  
away.

Yesterday's area @  
1000 m away

The group is moving  
We follow three  
Breggios are  
finally able to  
start last 2 PB  
@ 0910.

My back in terrible shape,  
Twisted in AM before  
leaving.

Finished PB Q  
1050 +  
returned to house.

Prepared for trip to  
B.H. w/ Beth.

My back is terrible.

Good flight w/  
2 men from Longman's  
English publisher +  
English language textbook  
order from Cambridge.

Jody meets me with  
wife Kathy. Dry drugs.  
Cocktail party with  
Jeremy M., Jo Bixby, Celio  
Ilmar Russ Jr., Cecilia,  
Zigone, Fernando, Claudio  
Padua, Kent, John Robinson

Back to hotel - more beer.

I go to room to prepare  
talk.

21 Feb 89

① Prepare talk

Bfast w/ Cembra

② To Jody's office

③ Palestra in Portuguese

④ Corracts

Interview w/ o Globo  
jornal do Brasil

Lunch Kent Redford  
Venia; a few talks  
in the P.M. Then  
OHLT mtg with  
Jeremy, Combra, Ibsen,  
Russ, Anthony Ry., Claudio,  
Songgruth.

A bit beated @  
Ilmar & the Diez's  
proposal re: Una.

Last talks: melt  
Sacy Meis Ambiente of  
Belo Hor. Wants OLT.

Back to Hotel  
dinner Combra, Jo G.,  
Jeremy.

To bed. Back  
somewhat better.

22 Feb.

up @ 0430 &  
catch 0700 plane.  
Met by Beth + Zigone.  
Drove back takes 5  
hrs (leave Rio 0830  
arrive home 1330) due  
to overturned truck  
in middle of road.

My back deteriorates  
& I spent rest of PM  
in bed on back reading <sup>Torn</sup> wolf.  
Dinner on.

Everyone especially me.  
Picking on Rosanne, inky,  
who has that quality of  
asking for trouble.

13 Feb up @ 0530

Back feels a bit  
better. Woke up  
notes.

Encounter of 4 animals  
with Xuxa at house

T<sub>4</sub> left arm with radio

♂ T<sub>1,2</sub> "

♀ T<sub>1-4</sub> right leg  
T<sub>3,4</sub> "

08<sup>24</sup> le Xuxa + start  
eating bananas.

Reunited in PR

24 Feb Deonizio removes Xuxa  
in AM - to Rio Zoo

2/27/89

John Robinson arrives  
AM with mayor of Silver  
Jarden + reporter.

We go out midday to  
look for Kannabateomys  
John, Judy Cecilia +  
I - See one in  
Bb patch but Ray  
can't get it.

Go out again between  
1700 - 2000 +  
see 2 Kannabateomys  
in Bl stand,  
One before dark that  
runs thru Bb ↑ + V  
and across patches.

The 2nd obsr. was  
by Jody of an  
animal eating after  
dark. Seen via  
headlamps. Red orange  
eye shine.  
Sitting holding stalk  
in hand.

2/28/89

Went out in AM w/

Zigie, Sam, John R.

To do experimental

playbacks with agents in  
Lincoln group. road

Group moves little.

♀ stays away much  
of the time while ♂  
interacts with 2 young.

Juveniles are ♂ & ♀,  
look different ages.

Bunals respond to  
TB with some movement,  
but mainly vocalizing.

According to Zigie  
their response was better  
than the other 2  
released groups.

Played back some  
clucks at the  
bird and got them  
Icc + Clucking  
for several minutes.

Clucking very contagious  
+ almost always done  
in pairs or trios.

Later a juvenile  
rasped several times  
very loudly —  
which we had not heard  
before.

Back to Reserve.  
Had group meeting

in afternoon with  
Otavio, Jody, Cecilia, Adriana,  
Beth, Zique, Janes,  
Fernando, + me.

Two hour meeting covering  
what people had done +  
were doing; problems;  
etc. Seemed to go O.K.

Dinner w/ John Robinson +  
Elizur came to  
meet J.R.

reddish caterpillars

1107

Grown on trunk / tree  
Young & R7 playing

1120 Grown responds  
immediately to LC  
with movement towards  
speaker & some LC/rec  
but the response fades  
w/in @ 10 min.

GR7 + GR6 begin  
playing on grnd

noon + dinner + 2 men  
come up hill looking  
for 4 men w/  
arms (ms)

As we crossed from  
other side of hill  
2 women held  
reported presence of  
4 mcs.

They had dog  
& animals came  
down to meet  
the 3 + the dog.  
noon -

group begins playing  
again w/B  
@ 12:40 but  
K207 doesn't  
join in ) perhaps

to conserve energy. B6  
joins in part of the time.

T4 - coprophagy  
Adult ♂ moves well  
when he wants to  
follow.

Leave group @ 14:50.  
In response to LCC  
They moved but no  
vocs.

Recordings mainly  
of chirps, Tsiks  
during play.

Also Discussion w/ Andy re:  
canceling Encounters + high school  
Prom.

~~Cerroga - Cecilia
